- Agile methodologies, manual testing, bug management, coordination, management
- Team player, attention to detail, problem-solving, time management, pro-active
- Language skills: proficient English, intermediate French and Italian, native Romanian

PROJECTS

- **Echo - replay your moments** - a full-stack web app designed to allow its users to search for and save YouTube videos to their profile and save specific time snippets to that, which they can later play in a loop. **(ReactJS, Express, PostgreSQL, SASS, Bootstrap)**
- **uPick - smart ToDo list** - a full-stack app that works with external APIs to find information about movies, restaurants, books and products. It automatically adds the item to the correct list based on keywords. The user can later mark the item as done or edit to change name and category. **(Express, PostgreSQL, EJS, SASS)**
- **Scheduler** - a single page application that allows students to book, edit or cancel interviews during weekdays. **(ReactJS, Express, PostgreSQL, StoryBook, Jest, Cypress)**
- **Tweeter** - single-page Twitter clone that allows posting to a message board. **(JavaScript, jQuery, AJAX, HTML, CSS)**
- **TinyApp** - full-stack web app that allows users to shorten URLs (similar to bit.ly). **(NodeJS, Express, EJS, Mocha&Chai)**
- **Jungle** - mini e-commerce application built with **Rails 4.2**.

Professional Training:

- **Web Development Bootcamp**, 2021 Montreal (Lighthouse Labs)
